From Dr. J. G. Green, of Chicago.
Your Pills have had a long trial in my practice, and I hold them in esteem as one of the best sperients I have ever found. Their alterative effect upon the liver makes them an excellent remedy, when given in small doses for bilious dysentery and diarrheat. Their sugar-conting makes them very acceptable and convenient for the use of women and children.

Too much cannot be said of your Pills for the curs of costiceness. I Fothers of our fraternity have found them as efficacious as I have, they should join me in proclaiming it, for the benefit of the multitudes who suffer from that complaint, which, although bad enough in itself, is the progenitor of others that are worse. I believe costiveness to originate in the liver, but your Pills affect that organ and cure the disease.

From Mrs. E. Stuart, Physician and Midwife, Hoston.

I find one or two large doses of your Pills, taken at the proper time, are exceilent promotives of the natural secretion when wholly or partially suppressed, and also very effectual to cleanse the stomach and expet worms. HONORED SIR: I should be ungrateful for the relief your skill has brought me if I did not report my case to you. A cold settled in my limbs and brought on exeruciating neuralyie pains, which ended in chronic rheumatism. Notwithstanding I had the best of physicians, the disease grew worse and worse, until by the advice of your excellent agent in Baltimore, Dr. Mackenzie, I tried your Pills. Their effects were slow, but sure. By persevering in the use of them, I am now entirely well.

We received by telegraph last night a copy of the Governor's proclamation summoning the Legislative Councillors to meet at New Westminster on the 21st instant, by which we see that the Capital question remains in an unsettled state. No decision on the subject has been come to-at least, the proclamation is entirely silent on the vital point. The Council is merely called together at New Westminster, where it will be perfectly competent for any honorable member to move an adjournment to Victoria-a motion which doubtless will be carried by a considerable majority. We think, however, it will be found that the permanent location of the Seat of Government will not be determined on until after Confederation shall have been accomplished. The Home Gov_ ernment-influenced by the numerously

country, by the vote of the Council last year, and by the heavy sacrifices we made in taking the bankrupt mainlanders on our backs-is sure to be well disposed towards Victoria as the Capital; but it would hardly recommend changes of even the most trivial character at a moment when it is preparing to place us under the Government of the Dominion. The Capital question is still an open one, and remains to be handed over with our debt to the Confederacy for settlement. Bat, pending Confederation, the Council may assemble at New Westminster and immediately adjourn to meet at any point in the Colony it may deem

The Council Proclamation.

NEW WESTMINSTER, March 9-Following is the Council proclamation:

Proclamation by His Excellency Frederick Seymour, Esq., Governor and Commanderin-Chief of the Colony of British Columbia and its Dependencies, Vice-Admiral and ordinary of the same, &c., &c., to the Ilon-Colony and every of them, and whom else it may concern, Greeting.

Know ye that I, Frederick Seymour, under and by virtue of all powers and authorities in me in that behalf vested, do hereby command, and by the tenor of these presents enjoin, you and each of you that on Saturday, the 21st day of March, one thousand eight hundred and sixty-eight, at the Council Chamber, New Westminster, personally you be and appear for the dispatch of business and to treat and conclude upon those things which in the said Legislative Council may be ordained.

LONDON, March 5-Late despatches from China and Japan have been received via India. The civil war in Japan raged with great violence. LONDON, March 5th-Midnight .- In the House of Commons, this evening, Disraeli appeared for the first time since the resignation of Derby. Upon entering he was recoived with loud cheers from both the Government and Opposition benches. Disraeli soon afterwards rose, and after giving notice of the introduction of certain motions relating to Scotland and Ireland, he referred to the retirement of Derby, saying his colleagues were loth to sever their connection with such a leader. No language could express their estimate of the character of such a chief and all most earnestly hoped for his restoration to health and power. Disraeli then proceeded to say that her Majesty had been pleased to intrust to him the task of forming | Francisco:

a Government, and he could not decline the gracious offer, accompanied as it was by the generous support of his colleagues. In domestic affairs the policy of Lord Derby during the last two years of his administration would be followed. In foreign affairs the policy of Lord Stanley would be adhered to. This would be the policy of peace and not one of isolation, but of jealous regard for our own interests and those of other nations. Such a policy would never lesson the influence or dignity of England. The general policy of the Government would be a liberal one (cheers and laughter). Recognising national traits as the best for securing national institutions, he regretted the necessity of continuing the suspension of the writ of habeas corpus in Ireland. As Lord Derby had said on a previous occasion, such action was the only safeguard against an unscrupulous foreign confederation. Such suspension of the privilege of the writ was not incompatible with a gentle exercise of law, and he was of opinion that the grievances of I:eland should be treated with tender regard for that country. After a few more explanations, not of general importance, Disraeli resumed his seat amid applause.

Boverier, member for Kilmarncck, said the policy of Lord Derby referred to by the Premier, was uncertain. If it meant retention of office only, the new Government will

In the House of Lords, Earl Malmsbury said the subject of Irish grievances would come up for discussion on Tuesday. After announcing the change in the Government, he added that its policy would remain unaltered.

Earl Russell said no confidence should be placed in a policy which was always saying 902 thing and meaning another. He said liberal members had given their support to Lord Darby on his pledge to bring about a reduction of the franchise, but none had in reality been made. Such apathy was unprecedented.

Confederation-The Governor's Reply.

Mr W K Bull presents his compliments to the editor of the BRITISH COLONIST and begs to inform him that when the despatch with reference to Confederation left his presence and was deposited by him in the Postoffice, there had been no tampering with it as insinuated in yesterday morning's paper-that there had been no tricks played with it-nor was there, as represented, any "ancient codfishlike smell" arising from the document. Mr W K Bull could only reconcile to himself the making of thee statements on the part of the editor of the BRITISH COLONIAT on the supposition that at the time of writing his fertile imagination had been "playing tricks," and that consequently the editor became unconsciously the victim of his own delusions. [We are glad to know upon such excel-

lent authority as Mr W K Bull that there was neither tampering or "tricks" played with retition, and that an "ancient and godfish-like" odor did not pervade the "docuesteemed correspondent explain how the Governor, receiving a petition on one subject, based his reply upon an entirely different one? The petition asked for delay in Confederation negotiations. The Governor re-

plies that an overland road offers "practical difficulties," a fact that everyone knew before. Mr. Bull's explanation, therefore, admits of but one inference being drawn from His Excellency's letter, viz, that the Governor in the most polite manner has snubbed the petitioners and advised them not to attempt to avoid "manifest destiny." Neither Governor Seymour nor Mr Bull combined can "delay Confederation," and the Governor, having instructions to hasten it, would not stop it if he could.] FIRE .- About four o'clock yesterday morning, smoke and flames were discovered

pouring out of the building known as Cleal's Restaurant and bar, on Government street, adjoining the Occidental building. The slarm was given by special officer Vinter, and in a few minutes the fire engines and truck were on the spot, prepared to battle with the fiery element for the supremacy. The flames, however, had gained great headway before the Tiger stream (which was the first thrown) could be brought to bear upon them, and in a short space of time the burning building was almost completely destroyed, nothing remaining but a mere blackened and charred frame. The surrounding property was in great danger At one time it was feared the fine brick building known as the Occidental, and Harris' Family Mar. ket (frame) would go; both buildings were at one time on fire, but were saved by the firemen, who, under the command of Chief Engineer Kelly and his able assistant, Kriemler, were untiring in their exertions. The flames were got under about six o'clock. While the fire was in progress a detachment of fifty marines were sent ashore from H M gunhoat Forward and stationed near the banks, fear being entertained at one time that the fire was caused by Fenian agency. The special police were also on hand, prefor any emergency. The fire is believed to have been purposely caused. The building and contents were insured for \$5,500. Mr Cleal was burned out on the same site about two years ago.

THERE is a Konigsberg cheesemonger who appears to have studied the constitutional laws of Prussia, or rather the standing orders of its Parliament, with especial view to their applicability to the art of puffing. He has sent a petition to the second Prussian Chamber requesting that the House will subject the cheese to an examination, and declare its opinion whether his cheese is not able to be appointed on this, as on every other petition; and the newspapers of course throughou. Prussia all mention this ludicrous incident, and advertise this ingenious man's cheeses at once gratuitously and most effectually. Day and Martin are utterly beaten: Their advertisements on the Pyramids cost them a good deal, and were probably much less effective after all.

REMARKABLE RECOVERY, -- Some months ago, as H M S Chanticleer was steaming through the Straits of Magellan, a ship's dingy, manned by two sailors, was ordered ashore to join a seining party. On the way sudden sweep of wind from the mountains and drifted off. The Chanticleer remained at anchor several days in the Straits, and search was made for the missing men, but they were not seen. Letters received from H M S Shearwater by last mail state that the men were found and rescued by that ship while she was passing through the Straits on her way home. The poor fellows had lived for forty days on musc'es, and were reduced almost to the last stage of starvation in consequence of an unusually high tide having covered the muscle-beds. They were taken on to England.

ACCIDENT .- A young man named Joseph Davies, while supporting the pipe of the Tiger Company at the fire yesterday morning, fell from the roof of Cleal's Restaurant through upon the first floor, while the fire was raging. Strange to say he was not burned in the least and escaped with a few slight cuts and

vada Enterprise of the 8th February says ;-A boy who was coasting on Union street hailed a Chinaman who was passing along with his donkey, ordering him to get out of the road. The Chinaman not getting out of the way as quickly as was the wish of his young lordship, he got off his sled, and drawing a six-shooter, shot the Chinaman through the neck, when he ran away and has not ye been found.

JURISDICTION .- In the suit of Alfred Fellows us the bark Aid, for damages done to goods from bad stowage, commenced before Judge Darwin in Washington Territory, the question of jurisdiction was raised by the defendants, when it was decided by Judge Darwin that the Courts of the United States had jurisdiction in the matter, and the parties are proceeding with the case.

RESTORED-On Saturday last a boy wa picked up by the police and taken in charge as unclaimed property; but vesterday a man from Bellingham Bay, claiming to be the father and giving satisfactory evidence thereof, received the boy from the authorities and returned with him to his native land.

MAGISTERIAL CHANGE .- We learn that Mr Pemberton, the popular and energetic magistrate of Victoria City for ten or twelve years, will shortly be ordered to Cariboo as Chief Commissioner and Magistrate, and Mr O'Reilly commissioned as Stipendiary Magistrate and County Judge for Victoria.

NAVAL Supplies-In a few days Messrs. Wilson & Co. will open the premises at Esquimalt, lately occupied by Mr S. Nesbitt, as a depot and bread and biscuit bakery for ping and residents generally, at Victoria

POLICE-The records of this Court yesterday presented quite a long list of cases for trial, all of which, however, were postnoned except charges against two clootchmen of drunkenness, who were each fined ten dollars, which sum they potlatched readily.

THEATRE.—The box-office will be open today and to-morrow, between the hours of 12 and 3, when seats may be secured for Mr Clarke's benefit. Only 25 cents extra will be charged on this occasion.

ROYAL HOSPITAL -Fifteen Directors will be elected by the subscribers to the Roval Hospital on the 19th inst., at 2 o'clock, at the Police Court room.

DISMISSALS .- It is reported that a number of officials at New Westminster have been discharged. How does the Assay Office stand?

The Last Battle.

At a late meeting in the Freemasons Tavern, London, under the auspices of the English Church Union, for the purpose of considering certain resolutions on the Riual of the Church of England, the celebrated Dr Pusey made the following remarks, indicating the attingtionism and choos which cating the atitudinarianism and chaos which is almost everywhere being manifested in that monstrous incubus on the nation—the state church.

state church.

Dr Pusey said—"This was the last battle
of the English Church—the issue was too
clear to be lost sight of. The ulterior objects
were avowed by the opposite party. It seemed to be almost insanty on a part of the section of the Evangelicals, in the face of the prevailing unbelief, to fight against those who had faith. (Hear, hear). He suggested the Ritual should be introduced auggested the Kittal should be introduced at the services attended by those who appreciated it, and that there should still be the old fashioned service at the old hour for the old fashioned people. Then there would be no occasion to afford redress to aggrieved parishioners, because there would be none. Laughter and obsers?"

The simple meaning of this is—they may

The simple meaning of this is—they may have an Evangelic service in the morning, and the Ritualistic service, with lighted candles, incense and the crucifix, in the afterfrom the National to the Romish DOOR.

M. HAUSSMAN is as absolute a ruler in the Department of the Seine as Napoleon III, is throughout France, with, however, less checks cn bis government. Like the Emperor he has his Council of Ministers, who are no more the choice of the taxpayers of Paris than the Imperial Cabinet is of the Legislative Body, and responsible only to him. He has his Budgets, which he yearly presents to his Municipal Commission, but over which those who furnish the funds that compose it have no control. He presented some days ago what no control is Memoire to the Municipal Commission, comprising first, compete with all other cheeses in the world.

The total receipt mount to 257,306,253f., and the total expen liture is something over 16 million less than

the receipts. SINGULAR DIVORCE SUIT—In the Rolla Heratd of Liberty are published the proceedings in the suit of Aston v.n Wormer vs. Margaret Van Wormer. The plaintiff is Judge Wormer, of the eighteenth judicial circuit. He sat in his case, and on the pleadings entered a decree dissolving the bonds of matrimouy between himself and his wife. The petition alleged, says the American Law Review, that defendant, wholly disregarding Review, that defendant, wholly disregarding her duties as wife of the plaintiff, offered such her duties as wile of the plaintiff, othered such indignities to the plaintiff as to render his condition intolerable in this, to wit: that defendant said she would stay in no such place as Rolla; that the defendant has frequently left the bed of plaintiff, and refused to lodge with him; that said defendant has, during most of the time since said marriage, hear ill, toward and even at times male, during most of the time since said marriage, been ill tompered, and even at times malignant, and for three days at a time had the mad, dumps silectly. Margaret, in her answer, 'admits that the matters and things as stated in raid petition may be all true,' and filed a written consent that the plaining might sit in this case; whereupon it was 'considered by the court and decreed, that the bords of matrimony heretofore contracted.

ENGLISHMEN IN THE FAR WEST,—Lieut. Butler, of the 69th Regiment, now at Brantford, Ont., writes to the London Times:— During some weeks spent on the prairies of Notracks, where we had gone in pursuit of buffalo, our party, consisting of four British officers, experienced nothing but the greatest kinduces, courtesy and attention from all ranks and persons. The kinducess was more particularly marked on the part of the officers of the United States army. For many days we were most hospitably entertained by the garrison at the frontier post of Fort Kearney. We went among them perfect strangers; they housed, horsed and fed us, and showed us the very finest buffalo hunting which it was possible to imagine; nor was theirs a solitary example of kindness and good-fel-lowship—wherever we turned our steps we found the same hospitality, and whether at the department, headquarters, or at an out-post, were alike received as old and well-known friends. I feel convinced, Sir, I need not apologies for troubling you with this letter, since it may tend, however slightly, to promote a better idea of the civility and courtesy which Englishmen meet with in America, even in these Fenian days.

Letters from Brest mention the extraordin-Letters from Brest mention the extraordin-ary effects produced by a new kind of tor-pedo tried in the river of Landerneau, which flows into the bay. The vessel selected for destruction was an old ship, the Wagram, of 109 guns, the first tier of which had been cut down. The new torpedo is far superior to either the English or American and Russian one. The former is only efficacious when one. The former is only efficacious when the vessel is passing over it; the latter are so contrived as to stick to the vessel and cause a shock. But the new French torpedo produced its effect at a distance of 12 metres from the hull and six metres below water. There were four torpedoes thus placed around the vessel, and connected by wires with an electric battery on shore. On the signal being given, three immense sheaves of water were seen rising to the height of a sixth were seen rising to the height of a sixth story; the wire of the fourth torpedo being probact, it did not go off. Nevertheless, the of the vessel were shivered, and there was barely time, owing moreover to the precautions taken, to run the vessel ashore. Such torpedoes will henceforth prove excellent safeguards to ports in time of war.

IDIOT CHILDREN .- Dr Hull, Superintenden of the Ohio State Insane Asylum, said reintelligent lady, who bore him ten children. After the birth of the first three the father After the birth of the first three the father became intemperate, and during his career as an inebriate four children were born unto him. He then reformed entirely, and had three others. The first three worse mart and women, and so of the last three; and of the four born to him during his inebriety, two have died in the lucatic asylum, another is there, and the fourth is an idiot." This is no isolated case. The records of every lunatic asylum, if examined, would fully corroborate the statistics published a few years since in hayden, it extanted, would fully corrobotate the statistics published a few years since in regard to the idiots of Massachusette, and prove most conclusively trat the use of liquors is impairing the health and reason and shortening the lives, not only of those who dish but of this offernage. who drink, but of their offspring.

THE owners of the Royal Mail Steam squadron of England came together lately to take counsel on the fact that their dividends had diminished one-half. A couple of their chief steamers had been wiceked in in the West Indies; but the great grievance was the fact that the French mail ships were beating theirs on the ocean routes
—a state of things due to the liberality of
the French Government, whose subsidies on
the West India route are double, and on the b. Zilian treete, those allowed by the Queen's Government to English ships. The London Times, commenting on this grave case, so of opinion that to maintain the British trade, influence and general supremacy at sea, these mail equadrons should get further assistance

The Paris correspondent of the London Star, says Mr Norton's marvellous invention for discovering the existence of water on the most acid land is attracting immeose attention in Paris, and experiments are daily made with it in the neighborhood of Paris. The Emparent has purchased the machine, and Emperor has purchased the machine, and emperor has purchased the machine, and personally superintends the experiments going on in the park of St Cloud. The instrument, as you are probobly aware, consists of a long iron tube, terminating in a sharp point, which forced into the ground has never failed within twenty-two minutes to bring water to the surface.

CURE FOR COLD FEET .- We are assured by one who has given the experiment a fair trial, that cold feet, and especially those superlatively frigid feet that are kept chilled superlatively frigid feet that are kept chilled by perspiration, may be relieved by a simple expedient. This is to wear cotton socks next the skin, and woollen stockings outside of them. In the inctence of our informant, the result was successful in keeping his feet warm and dry. The singular consequence also ensued, that at night he would find the cotten socks (next his skin) quite dry, while the outside stockings would be perfectly dame.

Scorcu Wir .- A little boy had lived for some time with a very penurious uncle, who took good care that the child's health should took good care that the child's health should not be injured by overfeeding. The uncle was one day walking out (the child at his side) when a friend accosted him, accompanied by a greyhound. While the clders were talking the little fellow, never having seen a dog of so slim and slight a texture, clasped the creature round the neck with the impassioned cry: 'Oh deggie doggiel and did sioned cry: 'Oh, doggie, doggie! and did ye liv wi' your uncle, tae, that ye are so thin ??

A Chinese almanac is a most extraordinary publication. The days for poughing, building travelling, and marrying are laid down in it with the greatest minuteness. The whole period of four seasons is divided into twentyfour solar terms, each possessing some characteristic name, and corresponding to the day on which the enters the first or lifteenth degrees of one of the twelve signs of the zodiac.

THE Rev. J C Fletcher gave us last evenng, a brilliant lecture on the religion, customs and people of Brazil. Seldom have we relished anything more them the picture he laid before his audience of that exuberant garden of the tropics laden with its strange variety of fruits and flowers, teeming with perpetual harvest for the hand of man Surely that country must be the garden of the world, and if its people had the enter-prise which moves this Yankee nation, im-agination could not set a bound to the results they would produce there. LIQUOR CARBONIS **DETERGENS**

trated Alcoholic Solution

[Extractfrom the Lancet, Dec. 22, 18663]
Liq. Carnons Derragars—We are very sceptical of the value of iew reme les, and it was in a spitle 'fsecuticism that we tried the liq. carbonis detergens. It is represented to be a concentrated alcoholic solution of the constituents of coal tar, and to contain all the active ingredients of the tar, to with benzine, mathaline, and other dents of the tar, to wit, benzine, napthaline, and phenic acid. The addition of water, with agitation, makes a durable emulsion, in which the tar remains it a state of fine suspension, aimost equivalent to solution. Our therapeutical experience of the oreparation is very satisfactory indeed. In our hands it has been a most effective agent in the case of various skin diseases, especially of the chronic excemations class; and one case of postriasis which had resisted all other kinds of treatment specially get well under the application of the liq, carbonis detergens. We esteem it a very valuable addition to our list of skin remedies, and worthy of a very extended trial by the profession. In the above classes of disease, and in various others, such as teid uties s, etc., the preparation is put into the form of sosp.

PURE COAL TAR SOAP (Registered as Sapo Carbonis Detergens.) This Soap is unrivalled as a

Skin Soap as proved by abundant medical testimony. By daily us infectious diseases are prevented, and a clear and healthy appearance imparted to the skin.

THESE different medicines represent the most recen nedical disoveries, founded on the principles of Chemwith secret or quack medicines, as their names suffici ently indicate their composition; a circumstance which has caused them to be appreciated and prescribed by the Faculty in the whele world. They widely differ from those numerous medicines advertised in the publi papers as able to cure every possible disease, as they are applicable only to but a very few complaints. The mos stringent laws exist in France with regard to the sale of medical preparations, and only those which have under gone an examination by the Academy of Medicin and have been proved efficacious, either in the hospital or in the practice of the first medical men, are authorised by the Government. This fact must be a guarantee for the excellence of Messrs. Grimnult et Co.'s Medi
